

1. Write a C program to read the value of an integer m and display the value of n is 1 when m is larger than 0, 0 when m is 0 and -1 when m is less than 0. (Use switch-case)

Test Data :

-5

Expected Output:

The value of n = -1

2. Write a C program to find the minimum between two numbers using a switch-case.

Test Data :

10 20

Expected Output:

10

3. Write a C program to check even or odd numbers using a switch-case.

Test Data :

7

Expected Output:

7 is an odd number.

4. Write a C program to check positive negative or zero using a switch-case.

Test Data :

-5

Expected Output:

-5 is a negative number.

5. Write a program in C to read any Month Number in an integer and display the number of days for this month using a switch-case.

Test Data :

7

Expected Output:

There are 31 days in month 7.

6. Write a C program to check whether an alphabet is a vowel or a consonant using a switch-case.

Test Data :

P

Expected Output:

P is a consonant.

7. Write a C program to calculate profit and loss on a transaction using a switch-case.

Test Data :

Enter buying price: 500

Enter selling price: 300

Expected Output:

Loss amount: 200

8. Write a program in C to convert temperature from Fahrenheit to Celsius and Celsius to Fahrenheit using a switch-case.

Test Data :

Press c to convert the temperature from Fahrenheit to Celsius.

Press f to convert temperature from Celsius to Fahrenheit.

Enter your choice (c, f): f

Enter temperature in Celsius: 37

Expected Output :

Temperature in Fahrenheit: 98.60
